## Profile

Results-driven **RPA Developer with 3.5+ years of experience in UiPath**, delivering end-to-end automation solutions across **healthcare and manufacturing domains**. Strong expertise in process analysis, SAP automation, API workflows, and Python automation with Selenium. Proven success in automating payment posting, charge rejections, ledger closing, insurance workflows, and EMR updates, achieving significant efficiency gains. Proficient with **SQL, AWS S3, SharePoint, Dropbox, GSuite, and Jira**. Recognized for reliability, scalability, and continuous learning mindset.

## Work Experience

Apr  
2024  
-  
Present

### Jorie Health Pvt. Ltd.

RPA Developer

- Developed UiPath bots to extract, validate, and process insurance payments and claims data across multiple web portals.
- Built automation to analyze charge rejections, denial reasons, and claim statuses, triggering actions such as rebilling or data updates.
- Integrated SQL database queries to support payment posting, claim tracking, and reporting accuracy.
- Led a Python automation (Selenium) initiative to support web-based healthcare workflows, reducing manual effort by 80%.
- Delivered HIPAA-aware, scalable automation solutions aligned with healthcare compliance standards.
